Call for Papers

Editor-in-chief

Toka Diagana, Department of Mathematics

Howard University, Washington, D.C. 20059

USA Email: GJPAManuscripts@aol.com

Dear Colleagues,

We are pleased to announce the launching of our new journal "Global Journal of Pure and Applied Mathematics (GJPAM)" dedicated to the publication of original papers dealing with pure and applied mathematics with some emphasis on all areas and subareas of mathematical analysis and applications. Authors are invited to submit their research papers to the journal. All submissions should be made electronically to the editor-in-chief through:(EIC: GJPAManuscripts@aol.com). More information on the journal, and the publishing process can be obtained at: www.rippublication.com/gjam.htm

The "Global Journal of Pure and Applied Mathematics (GJPAM)" welcomes submissions involving approximation theory; statistics; probability; fluid and solid mechanics; Fuzzy mathematics; transport theory; mathematical biology including population dynamics; wave propagation; special functions; algebra and application; combinatorics; coding theory; fractional analysis; variational methods; financial mathematics; asymptotic methods; graph theory; fractals; moment theory; scattering theory; number theory and applications; geometry of Banach spaces; topology and applications; complex analysis; stochastic process; bifurcation theory; differential equations; difference equations; dynamical systems; functional differential equations; partial differential equations; numerical analysis; integral equations; operator theory; Fourier analysis; matrix theory; semigroups of operators; mathematical physics; convex analysis; applied harmonic analysis; optimization; wavelets; signal theory; optimal control; ultrametric analysis; fixed-point theory and applications; reaction-diffusion problems; discrete mathematics; automata theory; and more

Beside the printed issues of the GJPAM, we plan to publish first year issues of GJPAM as Open access via website and it enables immediate, world-wide, barrier-free, open access to the full text of research articles for the best interests of the scientific community. Although GJPAM, will freely available online to all interested readers in perpetuity, some institutions and many individuals may still like to receive printed journals. GJPAM printed copies are available via annual subscription for \$150/ Libraries and \$100/ Individual.

With Kind Regards,

T. Diagana, Editor-in-chief

Global Journal of Pure and Applied Mathematics
