A short abstract (300-500 words maximum) should open the paper. The purposes of an abstract are:

The abstract should not attempt to condense the whole subject matter into a few words for quick reading.

Tables: Number tables consecutively with Arabic numeral and give each a clear descriptive caption at the top. Type them on separate pages but indicate in the margin of the manuscript where they should be placed.

Figures: All figures should be numbered with consecutive Arabic numbers and have descriptive captions on a separate page. They must be mentioned in the text and submitted separate. Their approximate position should be indicated in the margin of the manuscript.

Abbreviations: Where long words are repeated throughout the text, shortened versions or initials can be included in parentheses after the long words first appear and then only the shortened versions are to be used.

References: References are to be numbered and cited in the text by number. They are to be listed in the reference section of the paper in order of first citation in the text. If three or more authors have written a publication use the first author followed by "et al" in the text. References should be listed in the reference section in the following form:
